

## Java

```
class Solution {  
    public int maxStarSum(int[] vals, int[][] edges, int k) {  
  
    }  
}
```

---

## JavaScript

```
/**  
 * @param {number[]} vals  
 * @param {number[][]} edges  
 * @param {number} k  
 * @return {number}  
 */  
var maxStarSum = function(vals, edges, k) {  
  
};
```

---

## C++

```
class Solution {  
public:  
    int maxStarSum(vector<int>& vals, vector<vector<int>>& edges, int k) {  
  
    }  
};
```
